Northern Slopes Landcare Association

Free trees for landholders

Help us spread the word to landholders in your region

The Woodlands out West (WoW) project is offering between 50 and 200 **free native tree seedlings**, to eligible rural landholders in the **Bogan, Warren, Walgett and Moree Plains** Local Government Areas.

Interested landholders are invited to express interest in participating in the project **by 5pm on 15th March 2026**.

By taking part, landholders can help boost biodiversity, establish shelterbelts and windbreaks, expand paddock tree areas, and enhance primary production on their properties.

How you can help us spread the word to landholders:

- Post information on your **social media** accounts
- Share information through your internal and external **newsletters**

This pack includes some ready-made content to share with your **audiences via your communications channels and publications** to encourage landholder participation in the WoW project.

Together, we can secure a better future for our threatened species.

Background

Woodlands out West is a conservation project operated by the NSW Government's Saving our Species program. It focuses on the broader Collarenebri, Mungindi and Nyngan regions. Habitats in these regions can be highly altered and fragmented.

The project supports activities that protect and improve habitat for threatened species and biodiversity, whilst also benefiting productive farms, and healthy and resilient landscapes.
